CROSS DOOR 03-10

Keep food perfectly preserved in triple zone refrigerators

Seamlessly integrated into your kitchen, Hisense cross door refrigerators have three different compartments with flexible temperatures. Refrigerators with My Fresh Choice compartment additionally allows you to store food and drink at any temperature between -18 °C and 5 °C depending on your needs.

ALWAYS HAVE ICE & WATER ON HAND

Ice & water Dispenser

Hisense elegant Ice & Water Dispenser offers three unique settings: refreshing water, cubed, and crushed ice. Enjoy a glass of refreshing water or cool off any beverage whenever you want it.

Life is always more than one choice

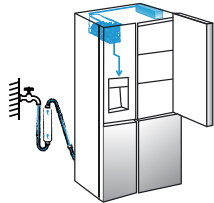

Without opening the fridge door, you can choose out of ice cubes, crushed ice or chilled water.

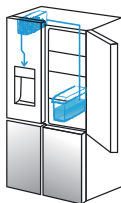

Two options water supply

With water filter: The stylish filtered ice and water dispenser offers you fresh cool water everyday without adding water every time. Fresh cool water will always be ready for you.

With water tank: The stylish non-plumbed ice and water dispenser offers everyday convenience of cooled water on tap, while also ensuring your fridge to be installed quickly and easily.

With Water Filter

With Water Tank

No plumbed water dispenser

The stylish non-plumbed ice and water dispenser offers everyday convenience of cooled water on tap, while also ensuring your fridge to be installed quickly and easily.

Metal-Tech Cooling

The rear wall of the fridge is overlaid with stainless steel, which ensures the cool air is distributed evenly from the inside out. This combination of advanced technologies ensures ideal temperature and humidity levels at all time.

Triple Zone

This fridge-freezer is fully adaptable to your needs. It has three different compartments with flexible temperatures - fridge, freezer, and My Fresh Choice section, each with their own controls. You can set the fridge and the freezer to whatever temperature suits you most.

STAY ORGANIZED WITH THREE COMPARTMENTS

My Fresh Choice

My fresh choice, the middle compartment, can easily be converted from a fridge and freezer with $-18^{\circ}\text{C}\sim+5^{\circ}\text{C}$ temperature setting. By creating the perfect temperature environment you need, you can prolong the freshness and taste quality of your desired food efficiently.

Recessed Metal Handle

The stylish recessed metal handles give access to easy open doors. The brushed design makes the handle easily fit into any kitchen design.

Metal Glide Drawers

All frozen items, even the largest ones, can now be reached easier and quicker, thanks to the durable metal easy-glide runners. Transparent design of the drawers, which can hold up to 27 kg, offers clear overview of the content.

Durable Inverter

The modern inverter compressor measures the conditions inside your fridge and adjust the cooling output accordingly, to ensure a stable temperature, save energy and run quieter, while also extending your appliances lifespan.

Dual-tech Cooling

The Dual-Tech Cooling system prolongs ideal humidity levels for an odour-free refrigerator and prolonged freshness of the stored food. By assuring different humidity levels in the cooling and freezer compartments, it prevents any mixing of odours and maintains a perfect climate in each part of the fridge.

Cantilever Shelves

Enjoy flexibility with the cantilever shelves. If you want more space between the shelves, simply take one out and place it on a different shelf-holder. That way you can tailor the inside of the fridge specially to your needs, therefore, all the large bottles, mason jars or tall cakes will fit perfectly inside the fridge.

Gallon Door Storage

Plenty of space to store large bottled beverages and other items in the fridge door thanks to Gallon Door Storage, which frees up space in the rest of the fridge.

Large Capacity

The refrigerator has a big capacity, so there is plenty of space in the fridge and freezer to store any shape or type of food. The refrigerator also has four doors that open out widely, so you can see everything at a glance.

SIDE-BY-SIDE 11-18

Keeping the ideal level of humidity and temperature in both fridge and freezer

The independent temp control cools the fridge and freezer separately so as to keeps the ideal level of temperature and humidity in both fridge and freezer, providing the optimum preservation conditions for different types of food and preventing odour transfer between food.

PLENTY OF ICE AND WATER

Ice & water dispenser

Equiped with Ice maker and Water Dispenser for convenient usage. You can choose from ice cubes, crushed ice and cooled water all at the push of a button. The Ice and Water Dispenser is able to produce both ice and chilled water.

Life is always more than one choice

Without opening the fridge door, you can choose out of ice cubes, crushed ice or chilled water.

Water Dispenser

It's so convenient you just place your cup under the dispenser and fill it with chilled water from your refrigerator.

Non-plumbed Water Tank

The stylish non-plumbed ice and water dispenser offers everyday convenience of cooled water, while also ensuring your fridge to be installed quickly and easily.

Digital Temp Sensor

Five high-effective Digital Temp Sensors are built in the refrigerator, as shown in the picture, which are engineered to adjust cooling.

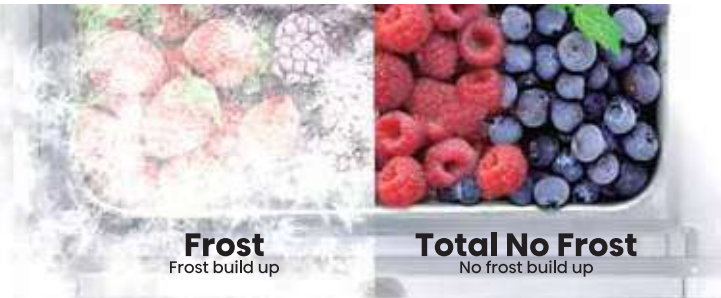

Multi Air Flow

Thanks to the even distribution of cold air achieved by the Hisense Multi Air Flow System, an optimum temperature is consistently maintained throughout your fridge and freezer – keeping food chilled to perfection no matter where it is placed.

Total No Frost

More advanced than ordinary frost-free, the innovative Total No Frost Technology from Hisense lets the cold air circulates evenly throughout your fridge and freezer to prevent ice crystals from forming, so there is no need to ever manually defrost.

Durable Inverter

The modern inverter compressor measures the conditions inside your fridge and adjust the cooling output accordingly, to ensure a stable temperature, save energy and run quieter, while also extending your appliances lifespan.

Chrome Wine Rack

A dedicated and stylish space for wine and soft drink bottles frees up space in your fridge door and prevents bottles from rolling around on the shelves.

Streamline Handle

Hisense refrigerators with recessed handles are the perfect combination of style and function. The ergonomic grip of the streamlined handle provides a modern feel and adds to the sleek appearance of your appliance, in a way that perfectly fits with the style of your kitchen.

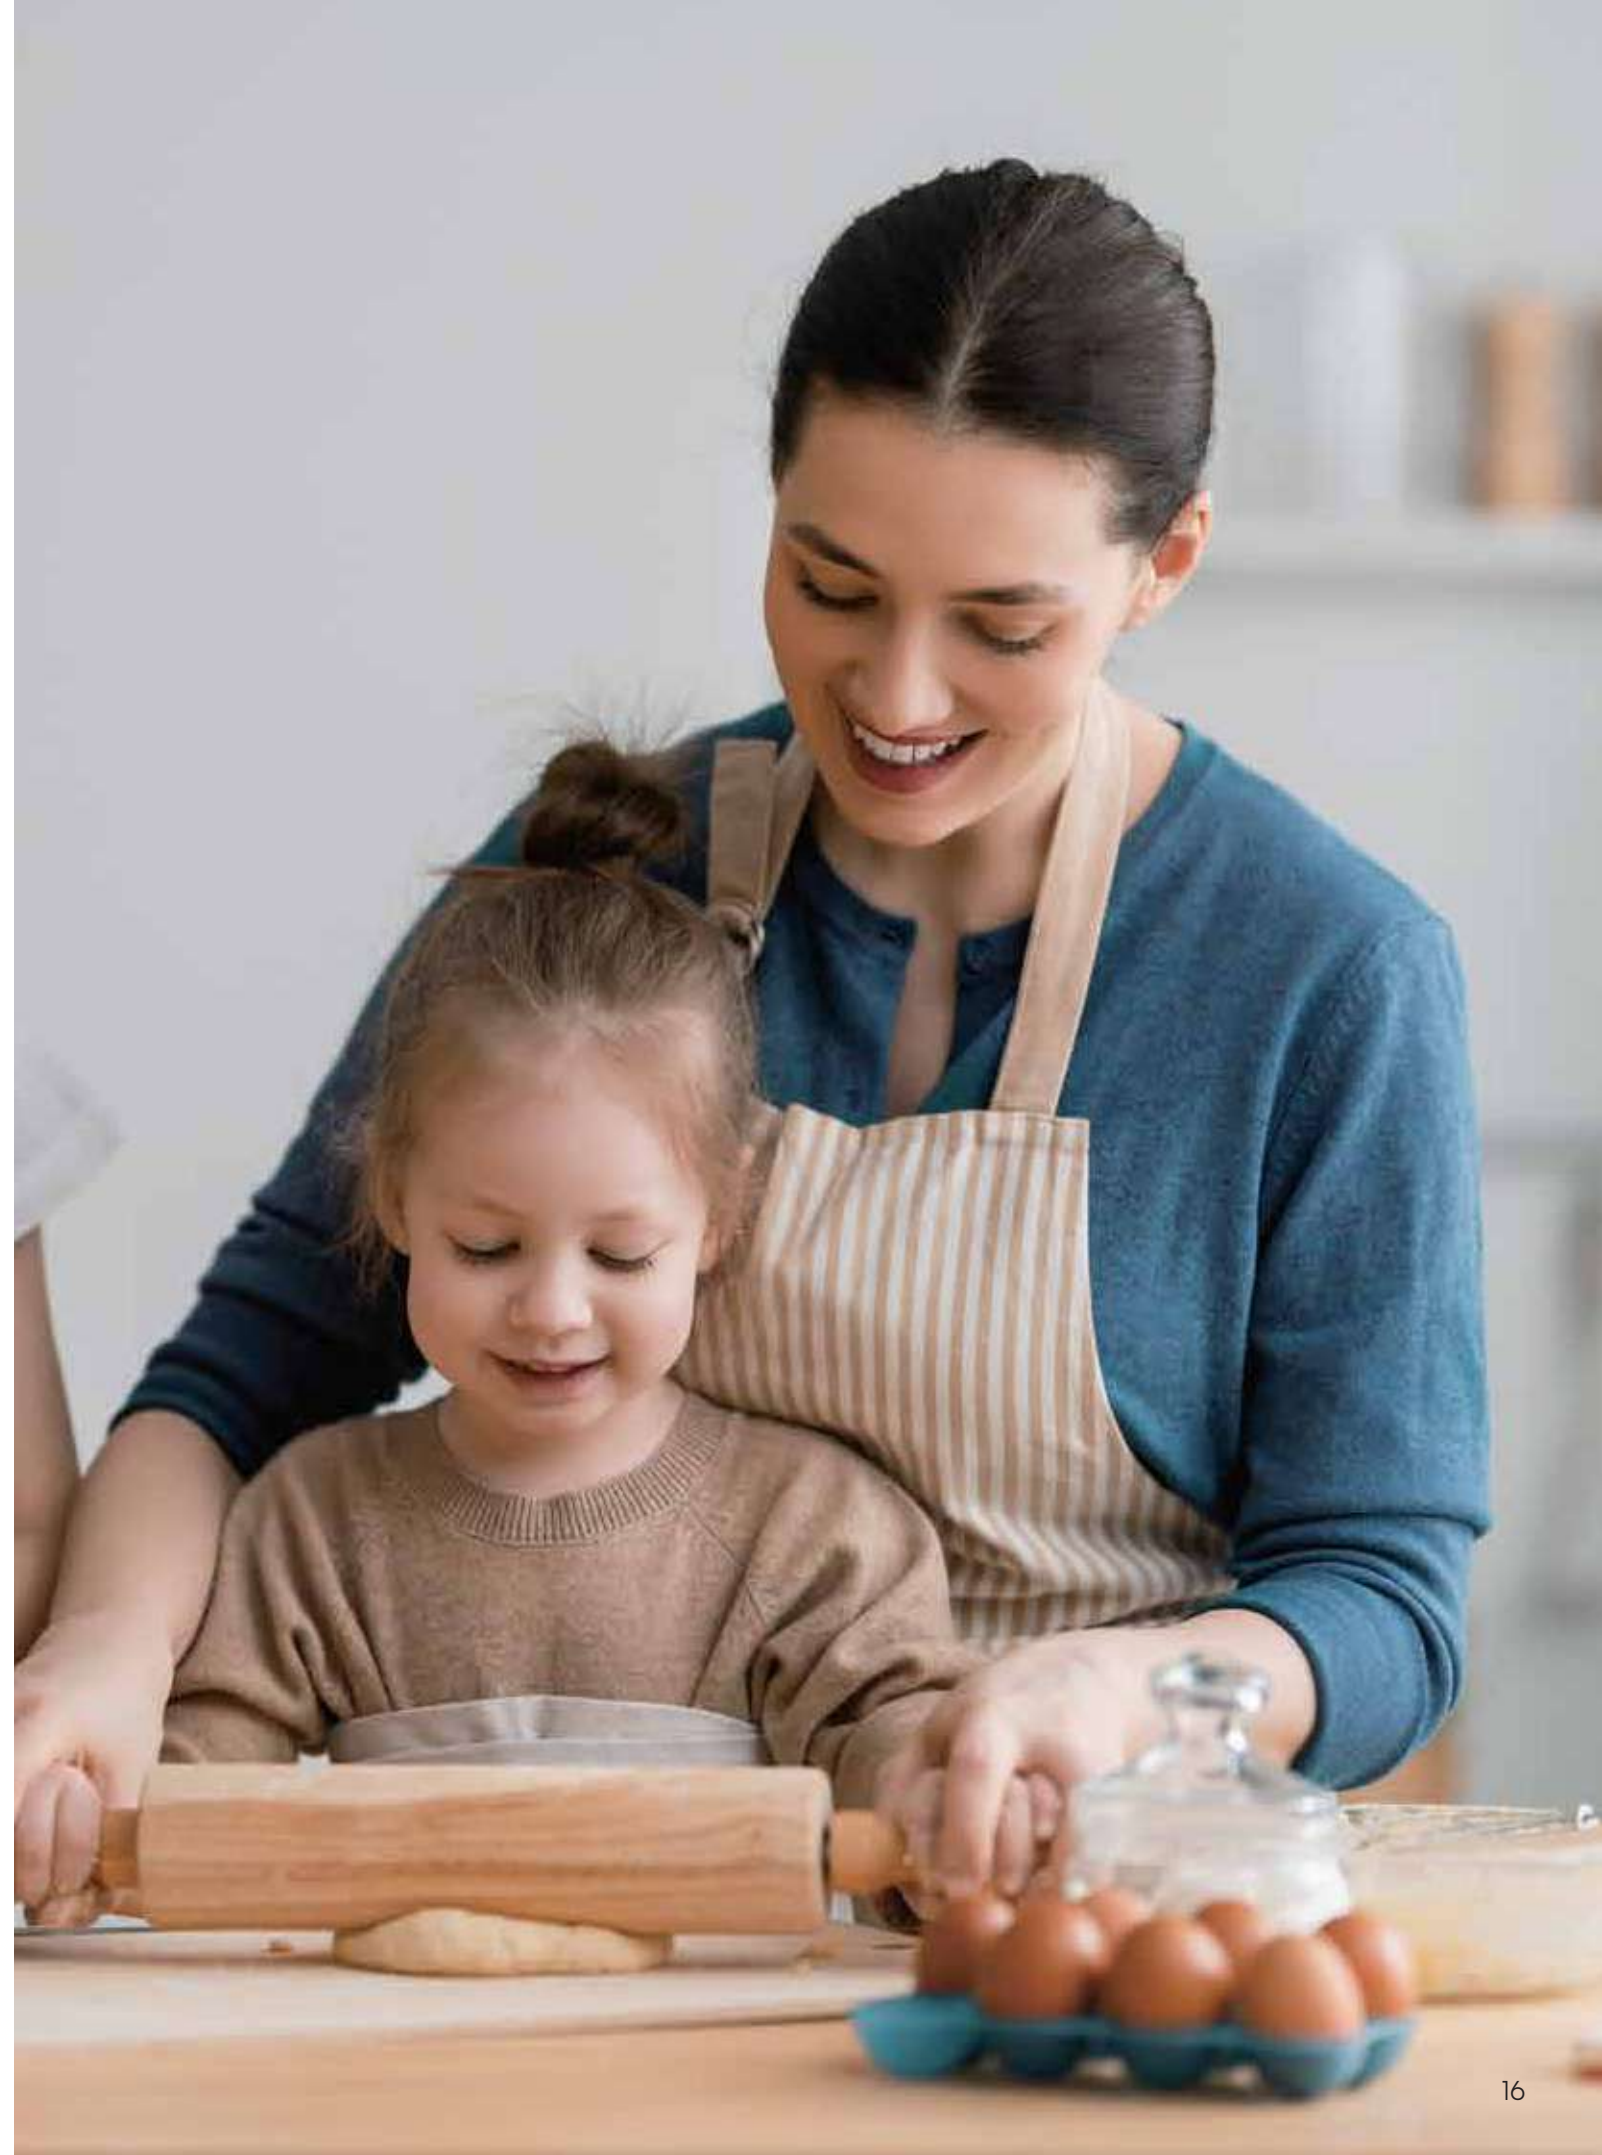

XXL Door Balcony

The refrigerator provides plenty of space to store large bottled beverages and other items in the fridge door thanks to the XXL Door Balcony, which frees up space in the rest of the fridge.

Extra Space

The extra space drawer provides you with enough space to store bulkier items such as joints of meat plus, the transparent design means you can easily see what's inside.

TOP-MOUNT 19-28

Cold and fresh are always ready for you

Hisense refrigerators aim to be your food management expert. Our top-mount nofrost series products use total no frost technology and multi air flow system to keep your cherish food fresh and nutritious for a longer time. The 90° door open, deodorizing filter and reversible door design make your using experience enjoyable.

ELEGANT & EASY USE DESIGN

Electronic Control

The Design helps you to control the machine easier and more conveniently. Electronic control improves the accuracy of temperature setting.

Adjustable Shelf

Enjoy true flexibility with the Fully Adjustable Shelf. Take the shelf out and reposition it using a different set of shelving slots to change the arrangement and capacity of the space, which you can use for placing large bottles, jugs or tall layer cakes.

New Twist Ice Maker

Only one knob to easily get the ready ice for your convenient life.

Deodorizing Filter

The Deodorizing Filter is made of Activated Carbon, which eliminates bad smells – keeping the air fresh and preserving the flavor of your food for longer.

Easy Approach Tray

This is a separate zone in the upper fridge, with a lower temp than the whole compartment. Fish and meat can be stored hygienically considerably longer, so it's perfectly fresh when it comes time to cook them.

90° Door Design

Gain full access to the contents of your fridge freezer drawers even if the maximum open angle for the door is 90° degrees. The ideal fridge freezer for where space is restricted, for example by a wall.

ALWAYS REFRESHED

Sleek Water Dispenser (Optional)

A sleek water dispenser that seamlessly integrated to the flat door of the refrigerator. Just pour fresh water in the water tank and enjoy it perfectly chilled, anytime.

Magnetic Door Switch

The usual door switch design has been upgraded and replaced by the Magnetic Door Design, which makes the interior design more elegant.

Total No Frost

More advanced than ordinary frost-free, the innovative Total No Frost Technology from Hisense lets the cold air circulates evenly throughout your fridge and freezer to prevent ice crystals from forming, so there's no need to ever manually defrost.

Multi Air Flow

Thanks to the even distribution of cold air achieved by the smart Multi Air Flow System, optimal temperature is consistently maintained throughout your fridge freezer. It helps keep your food chilled to perfection no matter where it is placed.

Counter Depth Design

This series products will fit perfectly into your kitchen with the new counter depth design, while offering plenty of flexible storage.

Large Crisper Plus

Deeper and wider crisper allow you to take the supermarket home, providing you with enough space to store large and more items.

Soft LED Lighting

Soft LED lighting is designed for more clear overview of the contents of your fridge and freezer. The light is brighter and more efficient than standard fridge bulbs, and it also saves energy.

Premium Design

The premium door and handle together with premium inox panel perfectly fit for this series refrigerator, which looks in high texture, easy clean and fits every kitchen.

Durable Inverter

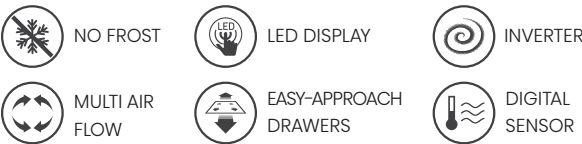

The modern inverter compressor measures the conditions inside your fridge and adjust the cooling output accordingly, to ensure a stable temperature, save energy and run quieter, while also extending your appliances lifespan.

CHEST FREEZER

37-44

Enough space for your food

Hisense chest freezers provide plenty of space to store any shape or type of food. It also has functions like my fresh choice and super freeze, which allow you to have the best preserve condition for your food.

My Fresh Choice

The My Fresh Choice drawer can be switched between fridge and freezer mode, providing users more selections to store various food.

Basket

The new Basket with handles (optional) can be pulled out very conveniently.

Easy Cleaning

The removable multi-sealed door design can effectively isolate external heat and make clean simpler.

Keep For 135h

This new chest freezer is able to keep the inside temperature staying on 0°C for 135 hours after powering off.

Ultrathin Hinges

The design of the ultrathin hinge allows the freezer to place against the wall, so you will have more space in the kitchen.

Hovering Door

This design makes it easy to open the door and leave it at an angle between 30 ° and 60 °, which means there's no need to hold it by yourself, allowing for hands-free use as products are loaded or taken out.

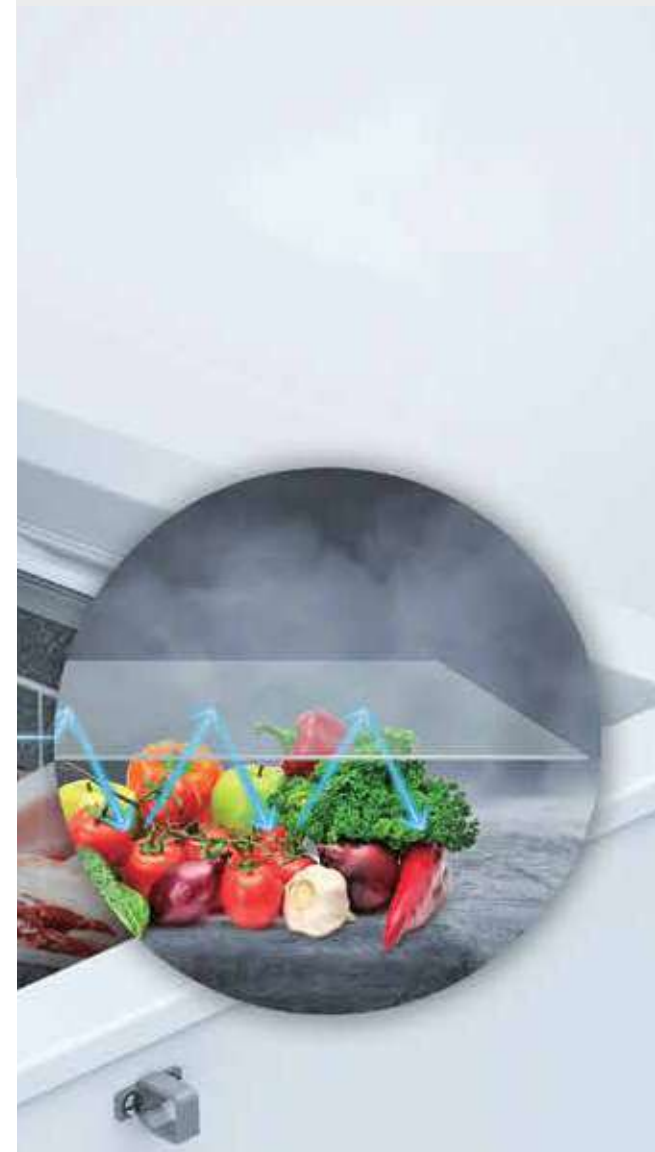

Adjustable Legs

Legs can be adjusted accordingly to ensure that your appliance sits steadily, even on uneven ground.

Inner Glass Door

The inner glass door design can lock the cold air to make sure your food keep frozen uninterruptedly. The sliding lids is not only stylish but also user-friendly.

Interior LED Lighting

The bright Interior Lighting makes it easy to see what's inside.

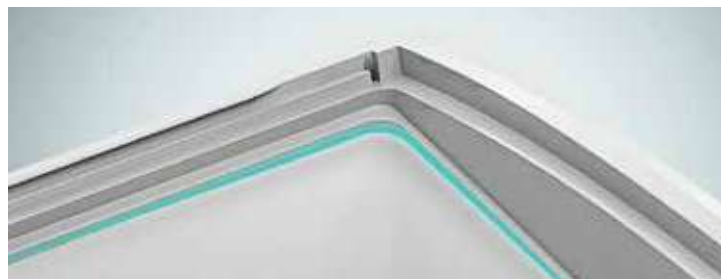

Condensate Draining

Gather condensate water, leave glass door clean and comfortable.

Metal Inner Liner

The curvaceous door frame with rounded corners provides excellent stability as well as an attractive design.

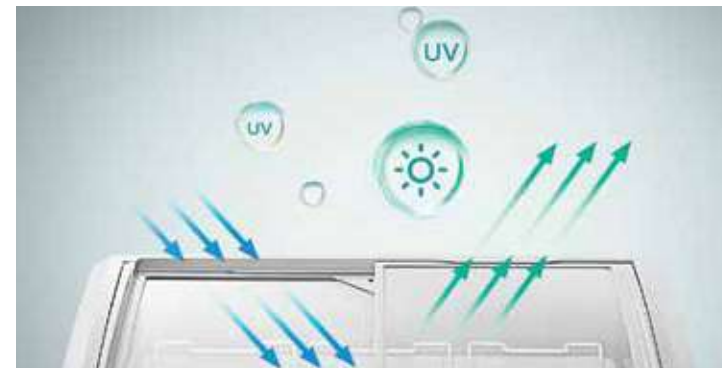

Reliable Casters

Provide more room from floor, easy to clean without removing the freezer.

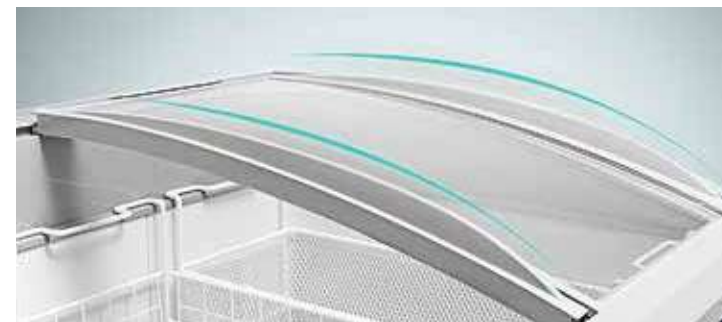

Low-E Glass Door

Low-e glass door can filter the heat up to 20%.

Curvaceous Door Frame Design

The curvaceous door frame with rounded corners provides excellent stability as well as an attractive design.

Digital Display

Digital display Thermostat makes it easy to set the Temperature.

COMMERCIAL APPLIANCES

45-52

From highest-quality material selection to refrigeration component design through to design development, long-term use of the appliances is always given top priority at Hisense. Models are therefore not only easy to load but also easy to clean, convenient to use, space-saving as well as energy-efficient and economical in continuous operation. And – they enable optimum product presentation. Attractive branding options enable you to effectively present your brand on Hisense appliances and stimulate impulse buying.

Defrost Water Self-evaporating

Self-evaporating system is very convenient for evaporative condenser, no need to remove water tray to pour manually.

Interior LED Lighting

The LED lighting in the cabinet have a good effect on displaying.

Metal Inner Liner

The Metal Inner liner has the feature of anti-corrosion.

Self-closing Door

Self-closing door system prevent loss of cold air and provide a easy life for you .

Low-e Glass Door

Low-e glass door can prevent condensation on the hollow doors.

Anti-dew Tube

Compulsory heating of anti-dew to prevent condensation on the mouth frame.

FRONT LOAD WASHING MACHINE 53-62

Smart washing, Easy living

Hisense's washing machine brings a better washing experience. ConnectLife, Smart Dosing, and Intelligent TFT Display can let your washing become much more smarter and convenient.

AI SUPER WASH

Automatically match the perfect wash cycle for your laundry by weighting and sensing loads. No more guess work, Smart Dosing helps to fully utilize detergent and saves each drop to reduce waste water, protecting the environment.

ENERGY MONITORING

Monitor your energy and water usage via ConnectLife APP. See how much water and electricity you've used per week, month and even year, and check estimated costs! By utilising this data, you can determine the best time to do your laundry to save both energy and money.

SMART ASSIST

By choosing your laundry's fabric type, colour, soil level and material characteristic, the washing machine will wash your clothes with a perfect combination of the right temperature, time, and water. Your clothes will always be in top shape.

SMART CONTROL

Smartly control your washing machine, including start, pause and various operations thanks to ConnectLife. Accessing and controlling your appliance is just a tap away, wherever you are.

SMART DOSING

With upgrade of added water hardness sensor and wash load sensor, the newest Series 7S will automatically choose the precise detergent or softener dosage. It can also store up to 24 loads of detergent at any one time, meaning you'll only need to refill it about once a month*.

*Based on the average of 6 loads per week / 5kg load / Medium soil level. Actual results may vary depending on individual use, the washing load and settings.

INTELLIGENT TFT DISPLAY

Featuring a 6.86-inch colorful TFT touch screen, you can set, control and stay informed about each wash.

CUSTOMISED PROGRAM

Customised program allows you to design your own washing program menu, through which you can select the programs and decide the order of your menu as you prefer it.

QUICK WASH+

Tackle laundry in a super-quick time. Simply choose from a 15min or 39 min programs, which are perfectly prepared for either 1kg or 4kg of laundry. Your clothes will be fresh and clean in no time at all.

HYGIENE GUARD+

The newest Series 7S washer is designed around hygiene. With a wide range of features like jet wash, UV light, sterile rubber seal, anti-bacterial soapbox and automatic drum clean, your laundry will always be clean and germ-free.

STEAM

The high-temperature steam fully-penetrates the clothes – helping to eliminate 99.99%* of Escherichia coli and Staphylococcus aureus. So you can guarantee your clothes are not just clean from dirt, but bacteria too.

JET WASH

The top-mounted jet drastically improves your wash at every step. The jet makes help remove stains from your favorite clothes and the detergent will be evenly spread to give you the perfect washing results.

UV LIGHT

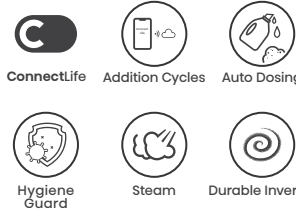

Using an inbuilt UV light filtration system, the water used to rinse your clothing is cycled through the UV filter, eliminating up to 99.99% of bacteria, ensuring your clothes are pristine at the end of the wash.

FRONT LOAD WASHER & DRYER

63-68

Smart washing, Easy living

Hisense's 2 in1 washer & dryer brings a better washing experience. ConnectLife, Auto Dosing and Slim display can let your washing become smarter and more convenient.

WASHER& DRYER 2 IN 1

Hisense's 2in1 solution allows you to wash and dry your laundry in just one appliance. Get the same quality results in half the space and with less work. This greatly improves the convenience of washing and drying clothes.

ENERGY MONITORING

Monitor your energy usage via ConnectLife APP. See how much electricity and water you've used per week, month and even year, and check estimated costs! By utilising this data, you can determine the best time to do your laundry to save both energy and money.

SMART ASSIST

By choosing the fabrics type, color, dirt level and any other stain, the washing machine will wash your clothes with a perfect combination of the right temperature, time, and water. Your clothes will always be in top shape.

SMART CONTROL

Smartly control your washer&dryer, including start, pause and various operations thanks to ConnectLife. Accessing and controlling your appliance is just a tap away, wherever you are.

HYGIENE GUARD

Hisense's product can remove bacteria through drum clean and soapbox clean, and the Pure Jet function can wash away the stains on the door and bellow. The bellow here is also made of sterile material.

AUTO DOSING

Your washing machine will automatically choose the precise detergent or softener dosage according to the weight of clothes. Better still, this machine can store up to 24 loads at one time - about a month without adding it again*.

*Based on the average of 6 loads per week / 5kg load / Medium soil level. Actual results may vary depending on individual use, the washing load and settings.

ALLERGY STEAM

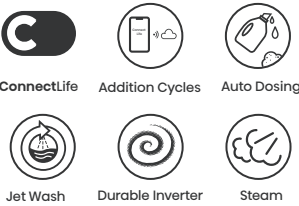

At the beginning of washing cycle, the Allergy Steam program releases penetrating steam that can eliminate 99.99% allergens and other microbes while keeping your favourite clothes clean and protect your skin.

STEAM REFRESH

Freshen up your laundry with the power of steam. The combination of steam and rotation removes unpleasant odors while softening your clothes without the need for a washing cycle, saving you water, time, and energy.

FRONT LOAD TUMBLE DRYER

69-76

Smart drying, Easy living

Hisense's dryer brings a better drying experience. ConnectLife, Intelligent TFT Display, and Self-cleaning Condenser can let your drying become much more smarter and convenient.

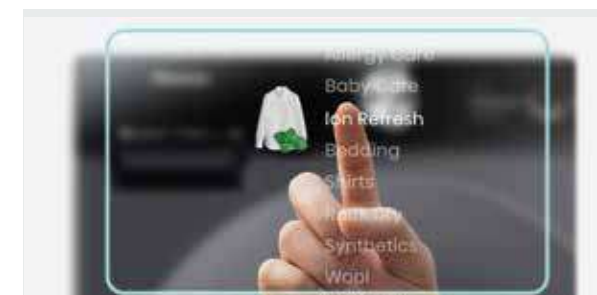

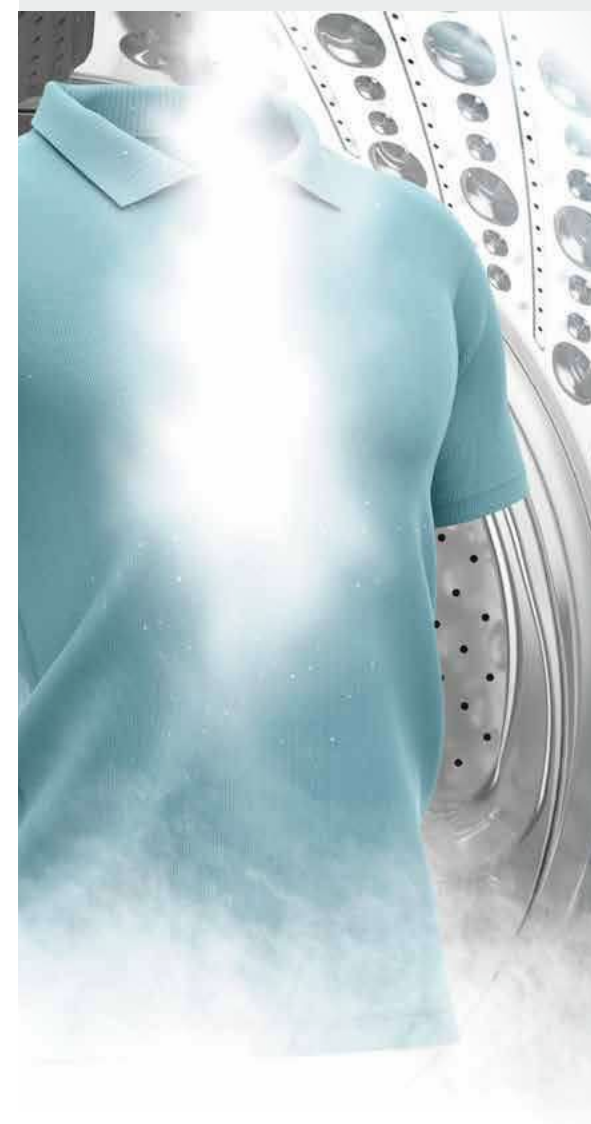

AI SUPER DRY

By humidity and temperature detection, the dryer will match suitable drying program and ideal drying temperature for your loads. With the help of sensors, the dryer will stop automatically when your laundry is done without damaging fabric.

POWER STEAM

Before your washing cycle starts, steam is released from the top of the drum, helping to remove wrinkles and odor. The right amount of water is then added, making your shirts smoother – without any ironing required.

INTELLIGENT TFT DISPLAY

Featuring a 6.86-inch colorful TFT touch screen, you can set, control and stay informed about each dry.

ALLERGY CARE

The sterilization drying uses high temperature hot air, which can remove 99.99% of Escherichia coli and Staphylococcus aureus without affecting the drying effect, leaving clothes dry and clean. No need to worry about allergy anymore.

SELF-CLEANING CONDENSER

With the Hisense self-clean function, the dryer will automatically clean and remove any lint left in the condenser, keeping your dryer clean and in a tip-top shape.

CUSTOMISED PROGRAM

Customised program allows you to design your own drying program menu, through which you can select the programs and decide the order of your menu as you prefer it.

SMART LINK

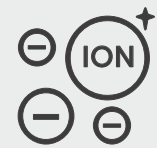

The washing machine sends the current washing program to the dryer*, which allows the dryer to intelligently choose the correct drying program to match, saving time and extra steps. The newest Series 7S can also be linked with multiple dryers.

* Smart Link is available when both the washing machine and tumble dryer are Wi-Fi connected, via Intelligent TFT Display or ConnectLife APP.

ENERGY MONITORING

Monitor your energy usage via ConnectLife APP. See how much electricity you've used per week, month and even year, and check estimated costs! By utilising this data, you can determine the best time to do your laundry to save both energy and money.

ION REFRESH

Use the ions of the ionizer to penetrate deep into the clothes to easily remove odors from the clothes and keep the clothes fresh and natural, which is more energy efficient.

REVERSIBLE DOOR

The door can be interchanged and adjusted freely. You can choose to have your dryer be either left or right-opening to suit the needs of any space or laundry layout, giving you complete flexibility over your setup.

GENTLE DRY

Gentle Dry uses a relatively low temperature to dry your clothes, making it perfect for sensitive fabrics and delicate items without worrying about shrinkage anymore.

ANTI CREASE

No more ironing after washing, the drum will stop heating and tumbling intermittently every 5 minutes, minimizing wrinkling through the rotation of inner cylinders. Your clothes will come out fluffy and smooth after the program ends.

TOP LOAD WASHING MACHINE

77-86

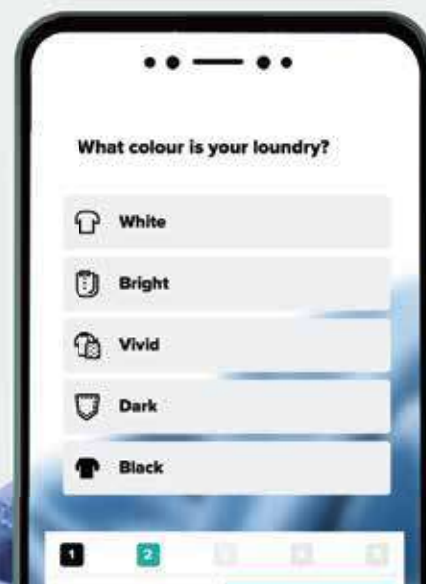

Smart washing, Easy living

With features that enable you to reliably achieve perfect washing results quickly, intuitively, silently and efficiently without damaging garments. The Top Loader embodies the elegance, gentleness and intensity of a mountain stream.

SMART ASSIST

Just choose your clothes style, color, dirty level, fabric, and the washing machine will do the rest for you.

SMART CONTROL

Smartly control your washing machine, including start, pause and various operations thanks to ConnectLife. Accessing and controlling your appliance is just a tap away, wherever you are.

SMART FUZZY

Enjoy precise laundry with Smart Fuzzy Control technology. The washer can weigh the laundry automatically and match the water levels accordingly. It makes washing much more convenient.

INTELLIGENT DISPLAY

Featuring a colorful touch screen, you can set, control and stay informed about each wash.

TIDE WASH

With faster rotation speed and shorter suspend time, Hisense top-load washer provides more powerful water splash forces detergent deep into your clothes for a thorough wash in less time.

REAR CONTROL

The Rear Control Panel offers a brand new appearance to Hisense top-load washer, which is more in line with the user's usage habits. More importantly, the rear control panel is more secure and durable, preventing safety problems caused by water droplets on the panel.

BUBBLE CLEAN

Hisense's Bubble Clean detergent box has a maze-like structure that facilitates dissolving and activation of the detergent, generating the bubbles that penetrate deep into the fabric fibers to remove stains.

MEGA CAPACITY

A bigger tub that allows you to do more laundry at once, satisfying your laundry need for whole family. This saves you time, energy and water, that would otherwise be wasted.

AQUA PRESERVE

By reserving water from the last rinse, you will save water and energy while minimizing your carbon footprint on the environment.

DD INVERTER

Hisense's direct drive technology uses frictionless mechanisms, which means your motor will work better without wasting more energy and vibrating less. This means it will last longer and work so quietly, even a baby could sleep next to it.

iJET™

The iJet™ system revolutionizes laundry with one spray nozzle that pre-soaks the clothes and evenly distribute detergent. This innovative technology shortens wash time while enhancing stain removal, ensuring your clothes are thoroughly clean in less time.

Experience a pristine clean faster.

iBUBBLE

The iBubble system uses a powerful water vortex to fully dissolve and evenly distribute detergent, creating a dense foam for impeccable cleaning. It also reduces detergent residue and keeps the detergent drawer spotless. Achieve deep, residue-free clean with the efficiency of iBubble.

SOAK FUNCTION

The extended soak in detergent-rich water allows for better detergent penetration of the fabric, for a more thorough and efficient wash. This leads to better decontamination and fresher laundry, as the soaking takes place inside the appliance as a part of the wash cycle.

SOFT-CLOSING LID

The tempered glass lid will help you watch the washing process clearly. The soft close glass closes safely, gently, and silently, so you won't be frightened by unexpected closings.

iFILTER

The filtration system filters water flow from three directions, particularly the left and right flow from the upper filter, removing lint and particles with 32.6% improved efficiency in safeguarding your clothes. Ensure pristine cleaning water that protects both your clothes and your appliance.

PETCARE

The pet hair removal program uses high water levels and specialized filters to eliminate pet hair and allergens from your clothes effectively.

MONOLITH DESIGN

The Monolith Design is a blend of modern elegance and unparalleled durability. Its precise lines and high-quality finish ensure exceptional stability, less noise and vibration and long-lasting performance, making it a true symbol of strength and a strikingly modern look in any home.

PUREFLAT LID

Effortlessly blending style and practicality, the PureFlat Lid provides a rimless, full-edge panoramic glass window. It is made of tempered glass for visibility and lasting strength, and has a soft-close mechanism for whisper-quiet operation. It offers first-class user interaction with the Hisense Knight Series 5 washing machine.

MEGA CAPACITY

The product can handle the young family's laundry in a single load. This saves valuable time and increases washing efficiency. The deeper drum design maximizes interior space and provides ample room for large loads without increasing the machine's footprint.

MAXLOAD OPENING

The large opening diameter of 516 mm* makes loading and unloading laundry child 's play. This thoughtful design feature reduces the user' s workload and saves.

DISHWASHERS 91-98

In Love With Technology

Hisense dishwasher transforms caring, functional and technical design into product manufacture, making it a much-loved part of your home. With its fully adaptable and flexible interior and a number of practical programmes, Hisense dishwasher will take great care of you and your family and will make your life so much easier.

CORNER BOOST

Corner Boost technology features two additional rotating nozzles on the underside of the dishwasher, which effortlessly remove even the most stubborn, burnt-on food residues leaving no trace behind. This means that every corner is reached, with special focus on the intensive zone of dishwashing.

SLIDABLE 3rd BASKET

Designed for maximum flexibility, you can slide the left and right panels of the top basket to the middle, in order to provide more space for even bigger plates for the lower basket.

EASY LIFTING

The middle basket can be lifted higher after loading to provide enough space for even the largest plates and pots in the bottom basket, making the dishwasher truly flexible and easy to use.

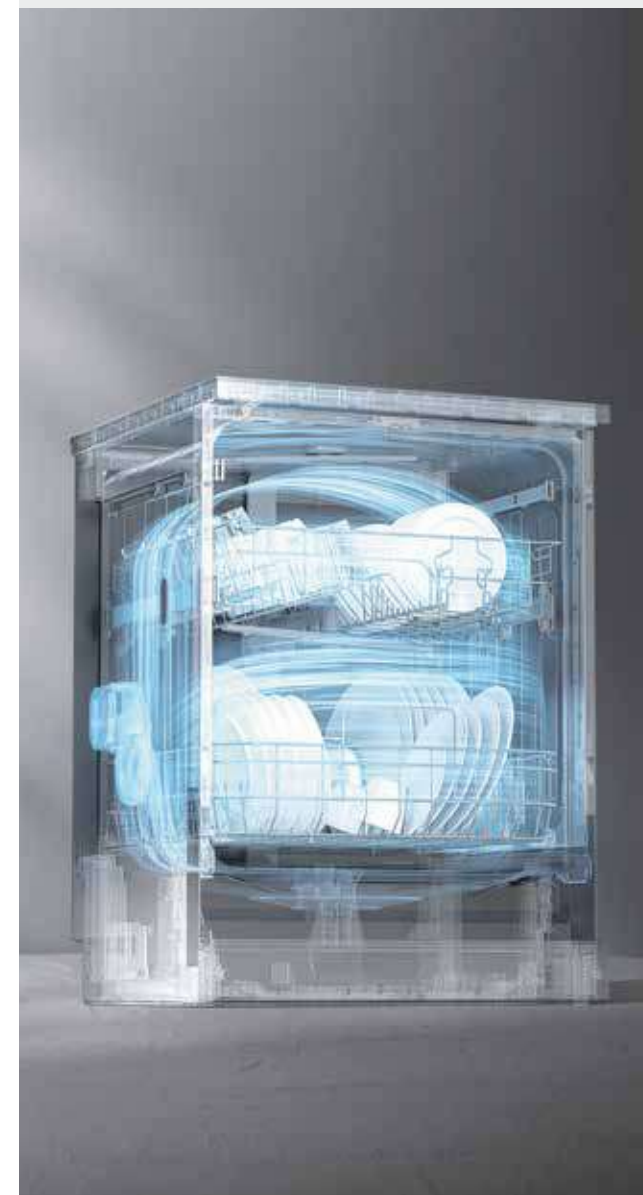

FLEXIBLE BOTTOM BASKET

This machine is highly flexible with its fold-down tines in the bottom basket. With which you can fit in as much cookware depending on your needs, providing you the ultimate flexibility of dishwashing.

AIR DRY

To get cabinet-dry dishes there is a special fan inside the appliance, that gently pushes out moist air while pulling in fresh and dry air, so that your clean dishes and glassware will be always dry, even the plastic items.

AUTO DOOR OPEN

Unload with speed, ease and no extra drying. Automatically opening the door slightly at the end of every cycle to circulate the air, ensuring washed items dry completely.

INVERTER TECHNOLOGY

This powerful brushless motor with the new generation of electronics is extremely efficient and provides better cleaning effects, saves energy and produces less noise.

LED LIGHTENING

Smartly positioned LED lights enable a perfect overview of the dishwasher's interior, making loading and unloading ever so easy.

SMART SOLUTIONS

The connected dishwasher offers remote monitoring and control over ConnectLife app. You can use voice assistant, track the washing process, monitor the energy usage, smart order and all other smart functions.

CONNECTLIFE

Connect your dishwasher to Wi-Fi via the ConnectLife app. Select your wash program, start and monitor the time left of your wash remotely, as well as receive notifications when your wash is complete.

AUTO PROGRAMS

Thanks to the inbuilt sensor, the automatic program will automatically adjust the time and temperature to suit the amount of the dishes loaded and the level of their dirtiness, ensuring you always get an optimized clean.

THREE LEVEL WASH

The dishwasher includes three spray arms, located at the top, middle and bottom of the tub to cover every inch of every basket to ensure the dishes are cleaned perfectly.

UV TECHNOLOGY

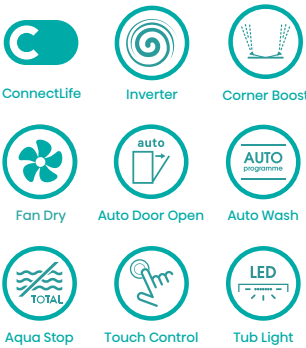

A UV light treatment beneath the tub sterilizes the water, removing up to 99.9% of bacteria and viruses from the rinsing water, leaving your dishes safe and clean.

HYGIENE WASH

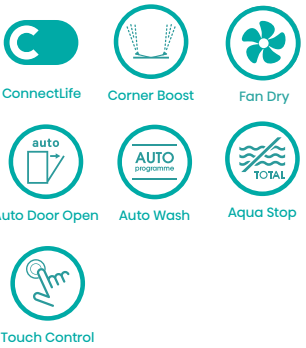

Hygiene Wash, with 75°C high temperature and longer washing cycle for sterilization, can eliminate most of bacteria, is best for cleaning baby bottles, chopping boards and similar.

01 WHO IS HISENSE?

Founded

Hisense was founded in 1969, with over 54 years of corporate history

Listed

Hisense owns three listed companies

TOP 30

China Best Employer in 2022

TOP 10

Overseas Chinese Brands in 2017-2023

TOP 10

Best Global Image Award in 2015-2020

UEFA Euro

Official Partner of EURO 2020 and 2024

FIFA

Official Sponsor of FIFA World Cup Brazil 2018 and Qatar 2022

海信国际中心

U Cool Series

Full Cooling Capacity

4-in-1 Filter

Golden Fin

Easy Installation Pro

I Feel

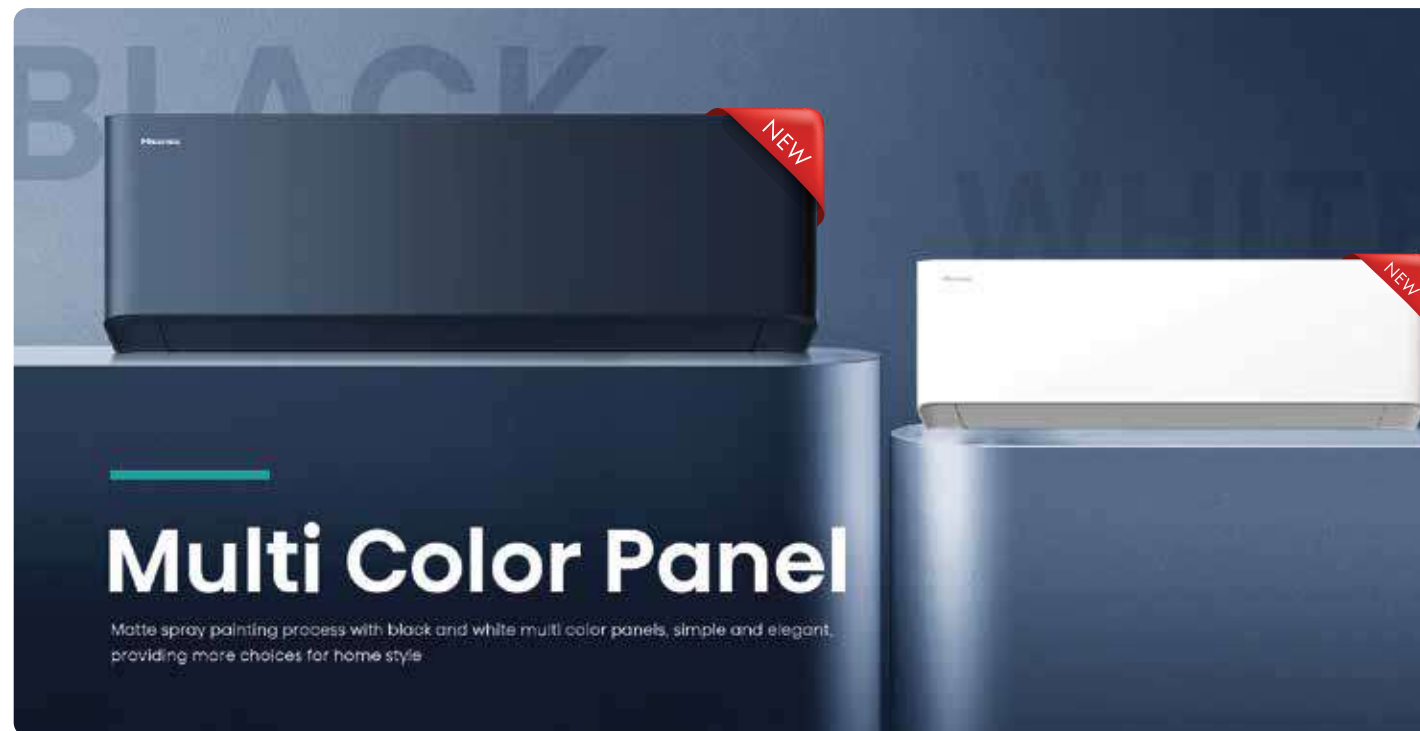

Easy to Clean

Ultra-Low Noise

Wi-Fi Control

Multi Color Panel

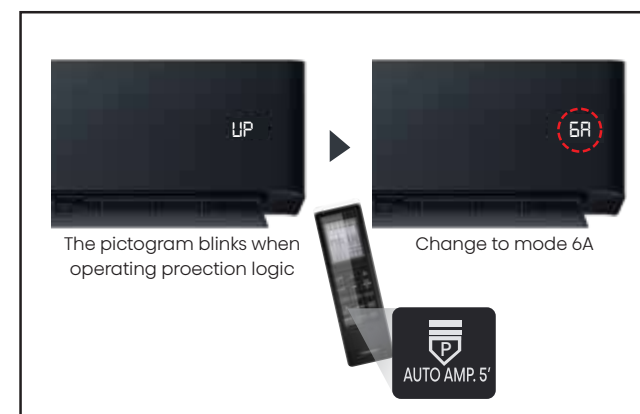

Matte spray painting process with black and white multi color panels, simple and elegant, providing more choices for home style

Auto Flexi Power Control

Hisense Auto Flexi Power Control adopt AUTO Current Control DEVICE(Bluetooth Device) provides the convenience of change from Source Power to Generator Power automatically.

Multi-level current adjustment

Supports multi-level current adjustment, one-touch switching via the remote control, and the display clearly feedbacks the current status (3A-9A)

Easy Maintenance

Replace PCB in 5mins, save 45%

Hi-checker

Outdoor unit with interface, can quickly connect Hi-checker device, convenient for after-sales maintenance.

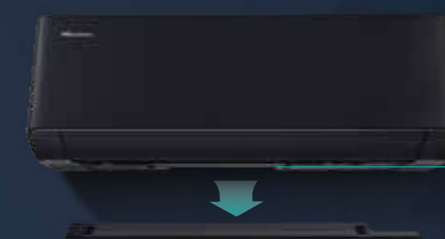

Easy Installation Pro

Adopting a detachable structural design and equipped with easy installation brackets, when the AC is hung on the wall, there is enough space to connect the gas-liquid dual-purpose pipe, greatly improving installation efficiency and making it convenient and fast.

Make installation easier and increase installation efficiency.

1. Detachable Bottom Cover

The bottom cover adopts an easy to disassemble structural design, which facilitates the connection of gas/liquid pipelines.

2. Wider Tubing Space

51mm wider pipe spacing, easy pipeline installation.

3. Mounting Plate Improvement

Multiple fixed points are designed for more flexible installation

Equipped with a level to quickly locate the installation point.

Equipped with hidden support frame for larger operating space.

Easy to Clean

The top of the AC adopts an integrated filter, which has higher sealing and better dust prevention. Easy to disassemble structural design, easy to clean horizontal blades and maintain stepper motors, saving 60% of time.

Integrated filter, easy to disassemble and wash

Easy to disassemble horizontal panel

Easy to disassemble louver panel

Snap-on design, no screws, easier to disassemble

T3 R410A Piston

Wall-Mounted

Dual Drainage

Long Distance Airflow

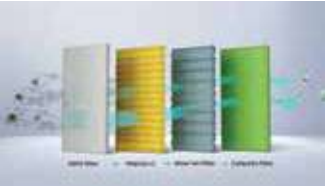

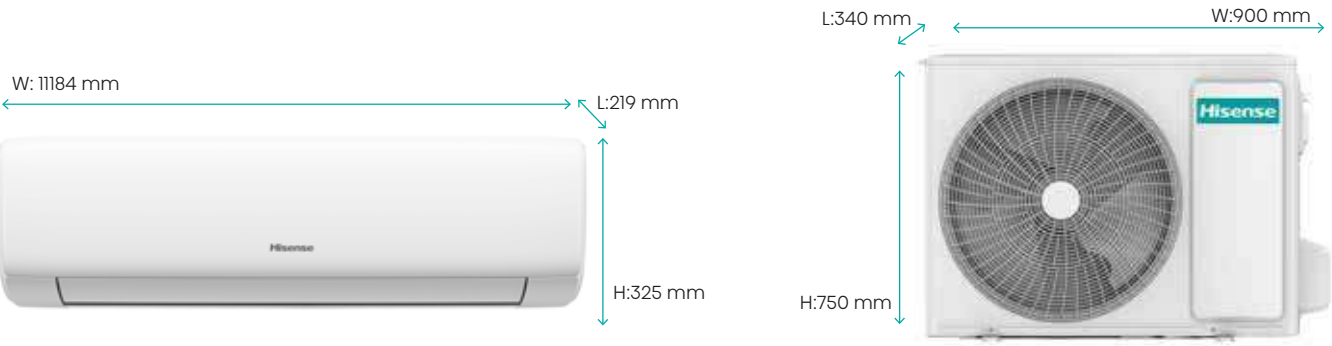

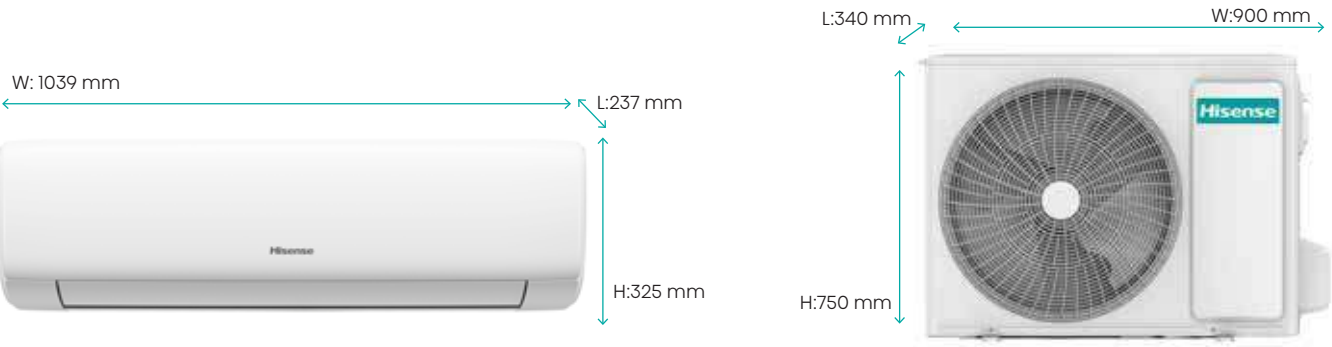

4-in-1 Filter

Strong Cooling at 58 °C

Turbo Cooling

4-in-1 filter
The combination of four types of filters can effectively remove all kinds of dust and odor in the air and refresh the indoor air.

Turo cooling/heating
Through QSD rapid inverter startup technology, compressor can reach the highest operating frequency as soon as possible, so as to quickly start heating or cooling.

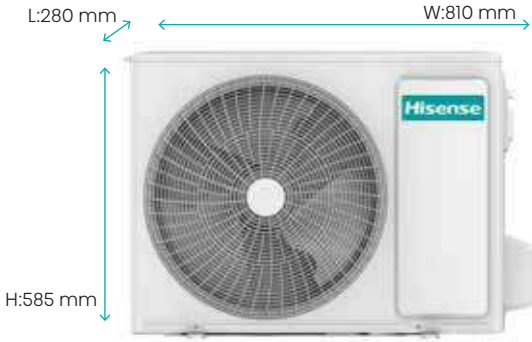

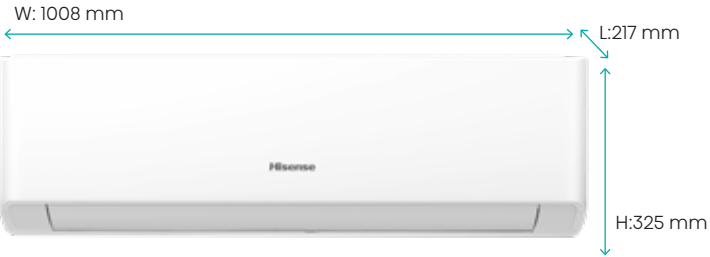

High energy efficiency
Relying on Hisense dual-mode inverter technology, without complicated settings, AC can immediately enter the energy-saving mode to minimize power consumption

Easy Installation
Easy-to-install wall panels assist with air conditioner installation; the double-sided clips are enlarged to provide more space for pipe connections, allowing for easy one-person installation

Turo cooling/heating
Through QSD rapid inverter startup technology, compressor can reach the highest operating frequency as soon as possible, so as to quickly start heating or cooling.

Wi-Fi Control
Through intelligent Wi-Fi control APP, after a Wi-Fi Connecting, you can control air conditioner anytime and anywhere.

AS-30TF4RKFC A00

Easy Installation

Easy-to-install wall panels assist with air conditioner installation; the double-sided clips are enlarged to provide more space for pipe connections, allowing for easy one-person installation

Anti-cold Air Design

Prevent cold air blowing out in HEATING mode. Once the heating function is started, you can enjoy warmth.

Wi-Fi Control

Through intelligent Wi-Fi control APP, after a Wi-Fi Connecting, you can control air conditioner anytime and anywhere.

Strong Cooling
at 58 °C

AW-18CT4SPAR01

AW-24CT4SPAR01

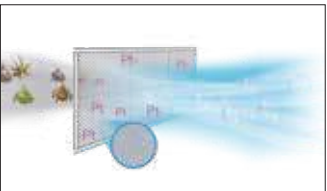

Strong Cooling 58°C

Not afraid of high temperatures, cooling at 58°C, providing a comfortable and cool experience in high-temperature environments.

Golden fin

The golden hydrophilic fins have high heat exchange efficiency and certain corrosion resistance. In addition, it is high-end fashion and more attractive.

High Density Filter

This high density filter can remove more than 90% dust, just simply wash out filter with water, you can enjoy fresh air everyday.

360° Universal Wheel

With 360° Universal Wheel , enjoy coolness everywhere you like.

Convenient Design
360° Universal Wheel, enjoy the coolness where you like.
Moving cool air, refreshing the whole room.

User Friendly Control & Display
Intelligent operation platform with big LED and large buttons.

Smart Mode
It can automatically set the operation mode according to the ambient temperature, such as refrigeration, intelligent defrosting, air supply and heating, which is intelligent and convenient.

UltraCool Power Long distance airflow

Equipped with advanced scroll compressor technology, it is energy-efficient and quiet, minimizing noise during operation to provide a peaceful and comfortable environment. It delivers powerful cooling performance, ensuring stable cooling even in installations with long piping and large height differences. Its high reliability guarantees worry-free long-term use

4D Air Flow

The air louvers which can swing vertically and horizontally helps to circulate air to every corner of the room.
